

Telenium Gen 4 Digital Telephone Gateway

Allows Vodavi branded digital telephones to connect to the Telenium IP system. The digital telephones are managed via the web interface just like IP endpoints. Most of the IP systems features are supported by the digital endpoints.

The Telenium IP DTIM8 also allows for remote mode connections. This provides the means to place the DTIM8 anywhere on the LAN or across the WAN.

- Upgrade for just a fraction of the cost of a new system
- Simple installation, network optional
- Most of the Telenium IP features supported.
- Programs from the phone or via web
- DTIM8 offers “remote mode” option to connect digital sets at offsite locations
- Supports: TR9015/9011, 3515, 3017/3015/3012
- Two year warranty
- Features include: text messaging, camp-on, off hook voice over to IP endpoints, soft keys follow IP endpoint options, excellent call quality.
- Never lose your investment with growth capacities up to 600 extensions
