

## Phone Buttons & Features

Button/Feature	Used to...
1 Headphone Jack	speak to a caller when using a headset instead of holding the handset.
2 Handset	answer or place an internal or external call.
3 LCD Display	display phone status information, dialing directories, and test message information.
4 Speaker	hear the other party during a call without using the handset or headset (hands-free mode).
5 MSG LED	indicate new voice mail messages are waiting.
6 Pre-Programmed/ Flexible Buttons (8)	access external line calls, pre-assigned features, or user defined feature code assignments. <b>Note:</b> <i>These include Flex Button 1: DND and Flex Button 2: CALL BACK.</i>
7 TRANS/PGM Button	set up a conference call or transfer a call. It is also used to access User Programming features.
8 SPEED Button	access speed dialing, saved number redial, and last number redial. Button is also used to access flexible button programming.
9 VOLUME Button	decrease (-) or increase (+) the volume of the speaker or handset while on a call. This button is also used to scroll up and down in the User Programming menus.
10 Microphone (MIC)	used to speak to a caller when in speaker mode.
11 HOLD/SAVE Button	put a call on hold or save the current User Programming setting.
12 Dialpad	dial phone numbers and make entries on the display.
13 SPEAKER Button	toggle between speaker (or headset) mode and handset mode. You can also use this button to exit any menu screen. <b>Note:</b> <i>The button LED is lit red when the Speakerphone mode is active.</i>

## 8-Button Digital Phone for SBX 320 IP Systems

### Quick Reference Guide

See back page for descriptions.
